CERTIFICATE

COMPUTER SCIENCE

Certified to be the bonafide project work done by **Jenolin Jeba J** of Class XII Section Ain PushpalataVidyaMandir, Tirunelveli-11 during the academic year 2021-2022.

Submitted for All India Senior Secondary Practical Examination held in the subject **COMPUTER SCIENCE** at ***PushpalataVidyaMandir Senior Secondary School, Tirunelveli.***

PRINCIPAL EXTERNAL EXAMINER

DATE: _____ SEAL

ACKNOWLEDGEMENT

I wish to express my deep gratitude and sincere thanks to Senior Principal Mrs. PUSHPAVENI AYYAPPAN for her encouragement and facilities that she provided for this project work. I sincerely appreciate this magnanimity by taking me into her fold for which I shall remain indebted to her.

I extend my hearty thanks to my Computer Science teacher Mrs.Hannah who guided me to the successful completion of this project.

I take this opportunity to express my deep sense of gratitude for their invaluable guidance, constant encouragement, constructive comments, sympathetic attitude and immense motivation, which has sustained my efforts at all stages of this project work.

Description:

Problem Definition:-

Booking a train ticket has never been easy. We have to go to the station, waitin line for a long time just to book a ticket. A lot of our precious time is being wasted while waiting for our turn to book the ticket. Our program helps the user to book their tickets from wherever they are at their own convenience. During tough times like the pandemic, it is better to stay indoors. So this program enables the user to stay indoors and the only time they need to step out is on the day of travel.

Objective:

The website has three modules namely Plan your Journey for booking their tickets , My Bookings to view their booking details, and Cancellation of Bookings if they change their mind about calling off their travel.

Methodology/ Planning of work: -

As soon as the user opens the page, he/she should log in using their Username andpassword and they will see four different options namely (If they don't have anaccount, they have the option to create their new account):

1) Plan your Journey:

If the user has chosen the first option, he/she can book their train tickets.First the user chooses the from and to locations and enters the date on which he/she wants to travel. The user has to choose from the following fourclasses of trains they want to travel in:

- 1st class
- 2nd class
- 3rd class
- Sleeper

Quota is also available for senior citizens, ladies, gents, general and tatkal service is also available for the users to choose from. Finally, the following detailsare asked:

- Name
- Age
- Phone number
- Gender
- Berth preference

Then a list of trains that run from the chosen locations during differenttimings will be displayed. The seats available at that time are also given.

Once the user has entered the above details, they are automatically taken tothe transaction section. Once the ticket payment has been successful, an e-ticket isprinted and a unique PNR code is generated. Then the user is taken back to thedashboard.

2) My Bookings:

If the user has chosen the 2nd option, the user can view their booking details as follows by entering their unique PNR code:

- Departure
- Destination
- Train class
- Class or Quota (if any)

3) Cancellation of Bookings:

To cancel any booking, the user must enter the PNR code of the booking tobe cancelled. If the reservation is cancelled within 6 days before the date oftravel, 50% of the amount will be refunded. If the reservation is cancelled onthat day, no refund will be given.

ABOUT INDIAN RAILWAYS

The first railway on Indian sub-continent ran over a stretch of 21 miles from Bombay to Thane.
The idea of a railway to connect Bombay with Thane, Kalyan and with the Thal and Bhore Ghats inclines first occurred
to Mr. George Clark, the Chief Engineer of the Bombay Government, during a visit to Bhandup in 1843.

The formal inauguration ceremony was performed on 16th April 1853, when 14 railway carriages carrying about 400 guests
left Bori Bunder at 3.30 pm "amidst the loud applause of a vast multitude and to the salute of 21 guns."
The first passenger train steamed out of Howrah station destined for Hooghly, a distance of 24 miles, on 15th August,
1854. Thus the first section of the East Indian Railway was opened to public traffic, inaugurating the beginning of
railway transport on the Eastern side of the subcontinent.

In south the first line was opened on Ist July, 1856 by the Madras Railway Company. It ran between Vyasarpadi Jeeva
Nilayam (Veyasarpandy) and Walajah Road (Arcot), a distance of 63 miles. In the North a length of 119 miles of line
was laid from Allahabad to Kanpur on 3rd March 1859. The first section from Hathras Road to Mathura Cantonment was opened
to traffic on 19th October, 1875.

These were the small's beginnings which is due course developed into a network of railway lines all over the country.
By 1880 the Indian Railway system had a route mileage of about 9000 miles.
INDIAN RAILWAYS, the premier transport organization

of the country is the largest rail network in Asia and the world’s second largest under one management.

ABOUT INDIAN RAILWAYS

The first railway on Indian sub-continent ran over a stretch of 21 miles from Bombay to Thane.
The idea of a railway to connect Bombay with Thane, Kalyan and with the Thal and Bhore Ghats inclines first occurred
to Mr. George Clark, the Chief Engineer of the Bombay Government, during a visit to Bhandup in 1843.

The formal inauguration ceremony was performed on 16th April 1853, when 14 railway carriages carrying about 400 guests
left Bori Bunder at 3.30 pm "amidst the loud applause of a vast multitude and to the salute of 21 guns."
The first passenger train steamed out of Howrah station destined for Hooghly, a distance of 24 miles, on 15th August,
1854. Thus the first section of the East Indian Railway was opened to public traffic, inaugurating the beginning of
railway transport on the Eastern side of the subcontinent.

In south the first line was opened on Ist July, 1856 by the Madras Railway Company. It ran between Vyasarpadi Jeeva
Nilayam (Veyasarpandy) and Walajah Road (Arcot), a distance of 63 miles. In the North a length of 119 miles of line
was laid from Allahabad to Kanpur on 3rd March 1859. The first section from Hathras Road to Mathura Cantonment was opened
to traffic on 19th October, 1875.

These were the small's beginnings which is due course developed into a network of railway lines all over the country.
By 1880 the Indian Railway system had a route mileage of about 9000 miles. INDIAN RAILWAYS, the premier transport organization
of the country is the largest rail network in Asia and the world's second largest under one management.

ABOUT INDIAN RAILWAYS

The first railway on Indian sub-continent ran over a stretch of 21 miles from Bombay to Thane.
The idea of a railway to connect Bombay with Thane, Kalyan and with the Thal and Bhore Ghats inclines first occurred
to Mr. George Clark, the Chief Engineer of the Bombay Government, during a visit to Bhandup in 1843.

The formal inauguration ceremony was performed on 16th April 1853, when 14 railway carriages carrying about 400 guests
left Bori Bunder at 3.30 pm "amidst the loud applause of a vast multitude and to the salute of 21 guns."
The first passenger train steamed out of Howrah station destined for Hooghly, a distance of 24 miles, on 15th August,
1854. Thus the first section of the East Indian Railway was opened to public traffic, inaugurating the beginning of
railway transport on the Eastern side of the subcontinent.

In south the first line was opened on Ist July, 1856 by the Madras Railway Company. It ran between Vyasarpadi Jeeva
Nilayam (Veyasarpandy) and Walajah Road (Arcot), a distance of 63 miles. In the North a length of 119 miles of line
was laid from Allahabad to Kanpur on 3rd March 1859. The first section from Hathras Road to Mathura Cantonment was opened
to traffic on 19th October, 1875.

These were the small's beginnings which is due course developed into a network of railway lines all over the country.
By 1880 the Indian Railway system had a route mileage of about 9000 miles. INDIAN RAILWAYS, the premier transport organization
of the country is the largest rail network in Asia and the world's second largest under one management.
